

The Next Evolution in eDiscovery on Your Terms

Nebula[®]: a powerful combination of capability and simplicity.

A User Interface That Feels Second Nature

Incorporating years of research and customer feedback, Nebula's user interface eliminates the common pain points experienced in other eDiscovery tools.

Designed to be both straightforward and familiar, Nebula minimises the learning curve while ensuring critical information is easily accessible and readily available. This translates into time and cost savings across the board. Nebula gives you everything you need right at your fingertips.

Superior Technical Capability

Nebula is powered by our patent-pending, battle-tested, proprietary technology created to improve the eDiscovery experience in the ways that matter to the case and the client. Our continuous innovation ensures clients always have the latest advancements in eDiscovery technology on top of a rock-solid, high-performance platform.

Our workflow accelerators and proprietary software eliminate the need for third-party plugins or partially integrated applications, providing everything you need in a single tool.

Multiple Delivery Options

Offering extreme flexibility, Nebula can be delivered as SaaS from the cloud or our ISO/IEC 27001-certified data centres, or even behind your firewall using a Nebula Enterprise™ or Nebula Portable™ appliance solution. Nebula appliances offer the same powerful processing, filtering, and analysis capabilities available in SaaS deployment models.

Enabling smarter ways to analyze, process, review, and manage large data sets, Nebula features:

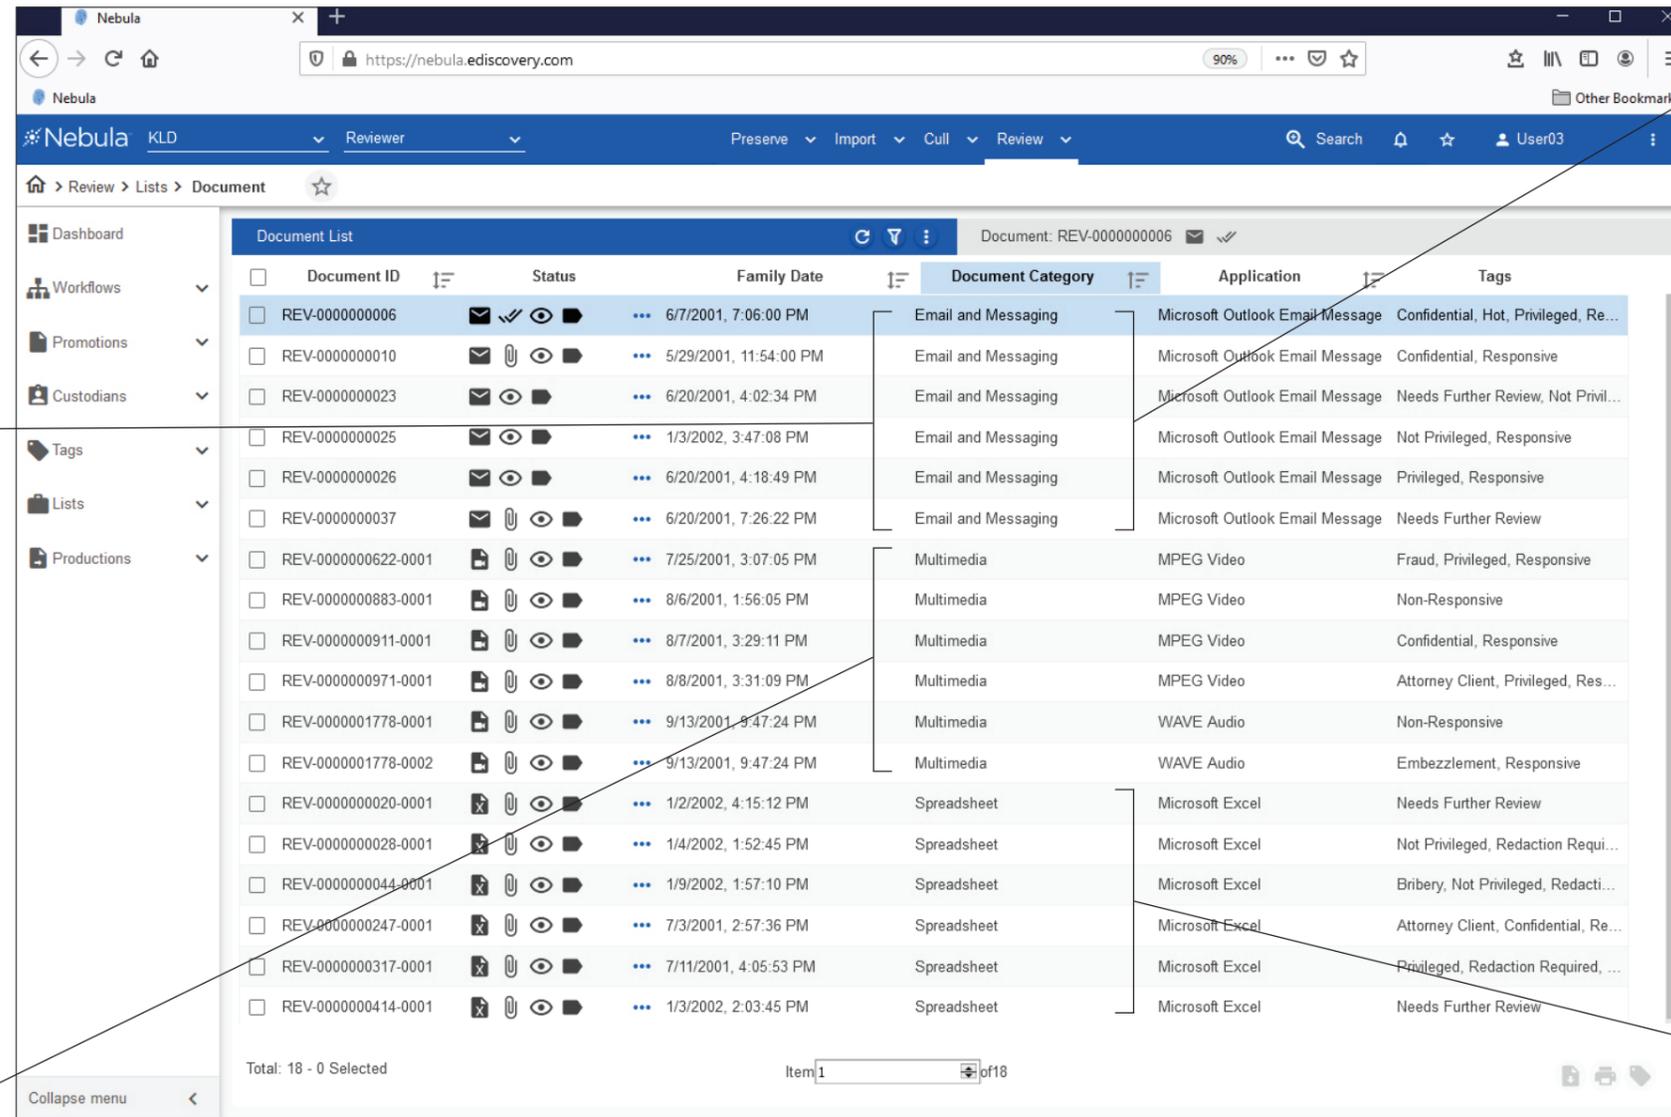

- End-to-end eDiscovery management in a single tool.
- Refreshingly simple design.
- Reliable and expertly built patent-pending technology.
- Flexibility to deploy in the cloud, in our secure data centres, in your data centre, or on-site.
- Backed by KLDiscovery's industry-leading 24/7/365 support. Experienced project managers and data analysts are available to assist at any point along the way.

PREDICTIVE CODING

Award-winning, patented technology that combines machine learning with human expertise to drive results. Nebula Predictive Coding supports common workflow strategies ("Prioritised/CAL/TAR2.0", Hybrid approaches) and integrates seamlessly with the reviewer experience.

NEBULA AUTOREDACT

Protect sensitive information and streamline the redaction process with an automated approach. Nebula AutoRedact greatly reduces the burden of redacting documents by automatically finding and redacting personally identifiable information, privileged content, and other sensitive information.

NEBULA AVV

Simplify the review of multimedia files with Nebula AVV. Nebula enables you to view video files, visualise audio files, and have total playback control. With Nebula, you can also easily redact and produce audio files—something no other review platform offers.

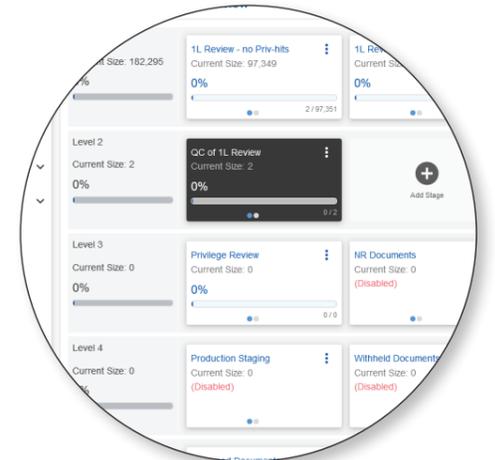

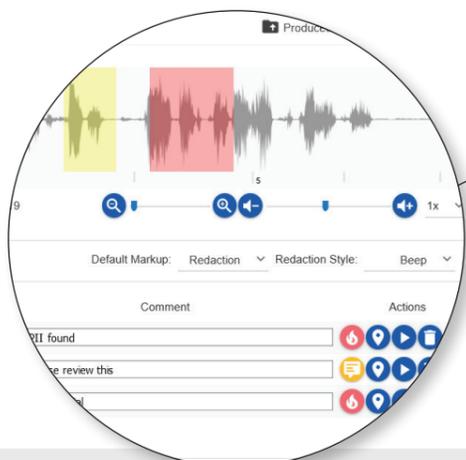

NEBULA SPREADSHEET REDACTION

Redact content from within Microsoft® Excel™ and other spreadsheet files without the need to convert to TIFF images. Options for redactions include removal of rows, columns, worksheets, formulas, cells, and standard text redactions. Pristine copies of the original file always remain intact.

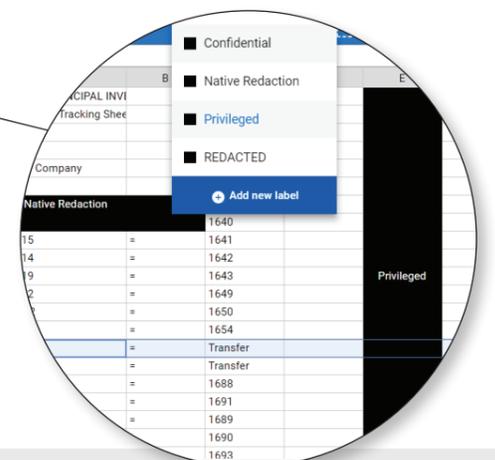

TEXT ANALYTICS

With Email threading and Near-duplicates text analytics, you can identify the most content inclusive messages and group similar records for a quicker review. Natural Language Processing enables users to visually locate documents pertaining to named entities, locations, and sentiment of the author.

NEBULA WORKFLOW

Automate the routing and distribution of documents to streamline document review and maximise accuracy and defensibility.

Built with User Experience in Mind

Nebula provides an intuitive yet powerful platform that distinguishes itself in both functionality and user experience, providing smarter ways to analyze, process, review, and manage large data sets.

DRAG & DROP IMPORTS

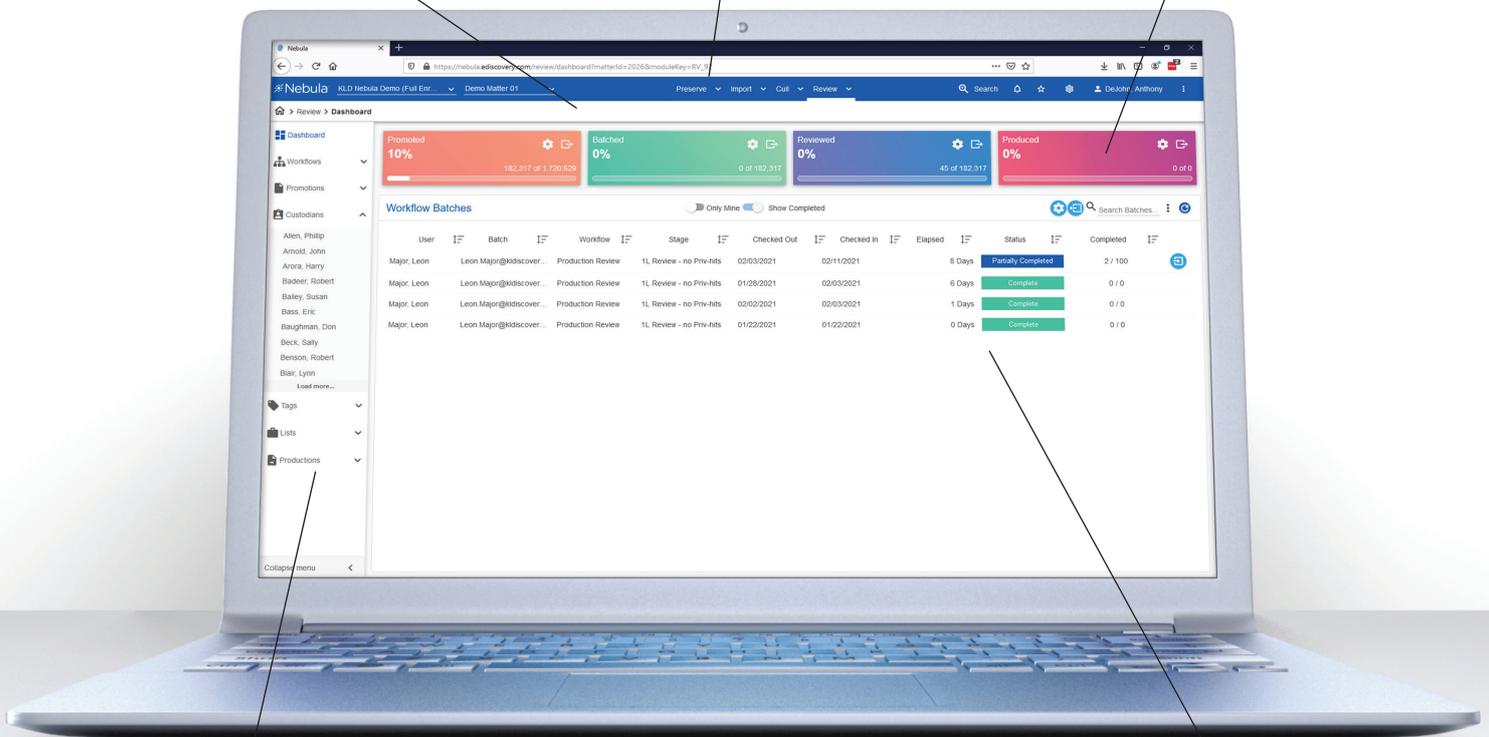

Easily drag files into Nebula from your computer or browse from a hosted folder with previously staged data.

TIMELY INSIGHTS

Powerful Early Case Assessment capabilities minimises the review set and reduces costs.

CUSTOMISABLE CARDS

Display the information that is most important to your review, including the quantity of documents in workflow, under review, and produced.

EASY NAVIGATION

Browse all documents, custodians, tags, and productions within one convenient interface.

AUTOMATIC ROUTING

Custom code multiple workflows to ensure the right documents get to the right reviewer.
