

Nebula Legal Hold™

Build a defensible legal hold process with Nebula Legal Hold.

There is no room for error when implementing defensible legal holds, yet corporate legal departments are increasingly required to do more with less. Teams are burdened with manually managing holds, administering communications, and tracking custodian compliance using spreadsheets and their inboxes.

Nebula Legal Hold, part of the Nebula Ecosystem, provides a full featured solution making it easy to manage multiple holds across any number of matters and custodians. Benefits include:

- **User Friendly** – designed to be simple and intuitive to use.
- **Contact Address Book** – easily maintain a current global custodian list by syncing information from Active Directory.
- **Setup Wizard** – follow a quick and simple process to configure communications correctly the first time, every time.
- **Scheduled Notices** – time notices for maximum impact.
- **Reminder Communications** – improve compliance with automated reminders.
- **Refresh Communications** – make sure custodians are aware of their obligations with automated notices over extended time periods.
- **Templates** – save work product for use in future holds.
- **Compliance Dashboard** – rapidly zero in on non-compliant custodians and initiate convenient follow-up.
- **Survey Builder** – collect additional information from custodians.

Our team of experts provides adept project management, comprehensive legal hold execution, strategic preservation and collection support as well as guidance around legal hold completion and release. Whether guiding legal hold setup and drafting custodial notices or facilitating relationships between key stakeholders, our experienced professionals help organizations effectively navigate the nuances of legal hold management to promote accurate preservation practices and enable efficient downstream collection and review.

Save time
and money by
