

Advisory Services

For more than 30 years, KLDisccovery’s service-enabled bespoke technology and software have helped law firms, corporations, government agencies and consumers solve complex data challenges through all stages of the data management, recovery, and discovery spectrum. We support our clients through both strategic proactive consulting and tactical matter-specific consultative collaboration. These services range from proactive program assessment and development through forensic investigation, data collection, early case/ data assessment, managed review and production.

Our experts provide unique perspectives and insights derived from decades of experience at the intersection of legal and technology. Combining extensive legal and regulatory knowledge, deep technical expertise, and real-world experience working collaboratively with clients across dozens of verticals, our team is the ideal partner for addressing any data-related challenge you may encounter.

Whether we are engaged at the outset or mid-stream, our approach is one of consultative collaboration to ensure the right resources are considered and deployed as needed.

KLDisccovery Solving Challenges Related to:

- Data proliferation
- Rapidly evolving technology
- Increasingly complex regulatory and legal environments
- Relentless onslaught of cyber attacks
- Demanding and costly discovery challenges

Our Advisory Services team enables you to benefit from the extensive experience and unique knowledge we’ve gained through supporting our clients through the most complex legal, regulatory, and technology challenges. **KLDisccovery’s areas of expertise include:**

Success Stories

- **Top Private Equity Firm**
Designed and documented the process to implement a data destruction policy for regulatory review, eliminating significant risk exposure.
- **Major Global Travel Brand**
Performed gap analysis and provided compliance recommendations for GDPR and CCPA readiness, addressing all aspects of data estate and governance.
- **International Auto Manufacturer**
Provided expert testimony in defense of spoliation claims involving Microsoft 365.
- **Top Global Consultancy**
Successfully designed, implemented, and documented preservation strategy for the court related to a high-profile lawsuit.
- **Global Beverage Company**
Migrated legal holds to Microsoft 365, implemented new legal hold procedures, saving tens of thousands in annual subscription fees.
- **For-Profit Education and Training Company**
Migrated and created a preservation repository for more than 115,000 mailboxes.
- **Large National Mortgage Processor**
Successfully managed and facilitated the remediation, extraction, and delivery of data for multiple national and global financial institutions.

You can leverage the proficiency of the KLDiscovery Advisory Services team to solve an array of data management and discovery needs:

Consulting Services

Our experts offer consulting support in all aspects of eDiscovery including data breaches, legacy data migration, Microsoft 365, second requests, and cross-border litigation.

Information Governance

Data archiving, enterprise solutions, and consulting services to empower organizations to better manage their data and be prepared for data events and challenges.

Meet & Confer Consulting

Strategic consulting to help define project scope and establish production requirements for eDiscovery engagements.

Computer Forensic Services

Industry-leading proprietary remote collection capabilities and global collection experts to ensure forensic best practices are followed during data collection and forensic analysis. KLDiscovery also offers forensic consulting and expert witness testimony.

Data Processing, Database Hosting, and Production

Proprietary data processing technology integrated directly with Relativity and Nebula®. KLDiscovery can also deploy mobile technology to address remote or onsite eDiscovery processing and hosting requirements. Our innovative infrastructure is ISO 27001 certified and operates in our state-of-the-art server configuration. In addition, KLDiscovery's infrastructure offers industry-leading redundancy to minimize risk and optimize data preservation. With KLDiscovery's scalability and flexibility, we can meet the most challenging document production requirements.

Data Analytics and Artificial Intelligence

KLDiscovery developed innovative proprietary review technologies including our patented Nebula Workflow and Predictive Coding solution. KLDiscovery also developed optimized Relativity and Nebula environments, including additional proprietary features such as Nebula AutoRedact, Nebula A/V, Natural Language Processing, PrivLog Builder® and Nebula Spreadsheet Redaction.

Managed Document Review

Managed document review services offered around the world having managed some of the industry's largest document reviews. Recently, KLDiscovery augmented this offering with our remote review program in response to Covid-19.

Cybersecurity and Incident Response

KLDiscovery has developed strategic partnerships with corporations, insurance carriers, and law firms to provide data analysis and recovery solutions in response to cybersecurity incidents. When engaged with KLDiscovery, outside counsel and supporting experts can quickly demonstrate, through our proficiency, to courts, regulators, and customers that you have taken fast action to recover from an incident. KLDiscovery is a world-class service and technology provider with proven technology to supervise the process independently and create the required supporting documentation to validate the integrity and maintenance of the data.

Data Recovery

We offer data recovery for businesses and individuals. Using a combination of over 30 years of experience, the world's largest R&D team and proprietary tools, our expert engineers provide the best chance at recovering your data.
